

Competitor

Vs

Premseal DWR10 PIB Sealant Tape

Industry-standard warranty of 20-25 years

WARRANTY

40 year warranty exceeding industry standard

Not system and manufacturer approved

APPROVED

Approved and recommended by manufacturers such as Kingspan for their Coldstore systems

Import delays and inconsistent sourcing of raw materials producing lower quality

QUALITY

UK manufactured for ease of supply and consistent quality of raw materials you can trust

Butyl rubber, which has reactive sites that are vulnerable to environmental damage

MAIN MATERIAL

Fully refined naphtha stream, which has high environmental resistance

Often modified with low-grade polymers, lowering product lifespan

COMPOSITION

Consistent quality sources of raw materials (% polyisobutylene (PIB) polymer)

Addition of low-grade polymers reduces flexibility

FLEXIBILITY

Long-lasting flexibility

Standard, generic designs

PROFILES

Custom bead designs available for superior adherence

Failed in under 1 week

STRESS TEST

Lasted over 4 weeks

We tested our PIB Sealant against a competitor material at 80°C
